<b>Campaign consultant contact information (name, email, phone number)</b>	Winpower Strategies info@winpowerstrategies.com 206-428-7910
<b>Do you agree to not accept campaign donations from fossil fuel companies?</b>	Yes
<b>Have you signed or will you sign the No Fossil Fuel Money Pledge (https://nofossilfuelmoney.org)?</b>	Yes
<b>Why are you running for this position? What in your background has led you to run? (100 word limit)</b>	

I am an ICU nurse. I am running for state representative because I want to work to increase access to healthcare, which includes protecting women's rights, work to bring down prescription drug prices, help recruit and retain officers to help keep our community safe.

I want to help offset the growth in homelessness with improvements in access to mental health care, help improve affordable housing in the area, help bring family wage jobs to Clark County and help to lower property taxes.

**What are your most significant accomplishments on environment and climate change?**

I am a first time candidate so I do not have a track record to answer this question as thoroughly as would like. I would like to be an advocate for the environment and climate change but I have to get elected first.

**Briefly list organizations, events, rallies, canvassing, referendums, or petitions you have engaged in to advocate for environmental protections?**

I am going to be honest, I do not have much a leg to stand on to answer to this question. I will say that during this campaign year, I have been at multiple events with Don Steinke and I have asked him multiple questions on environmental issues as one of his major platform topics is an affordable clean energy future. I will also add that my lack of documented advocacy for environmental protections does not mean it is not important to me. It just means that I am getting a late start but I intend to start at the legislative level.

**If elected or re-elected what specific environment, climate change, biodiversity, and environmental justice legislation will you prioritize and champion?**

Continuing to establish a clean fuel standard. Keeping transportation fully funded and protecting key conservation programs in the state budget.

**For state office positions, what action will you take to accelerate efforts towards Washington State's 2030 Climate Goals, specifically a 45% reduction of carbon pollution below 1990 levels?**

With so many areas of climate invest that will be getting attention over the next several years, I hope to be a part of many actions toward the state's goals. Whether it is transitioning all state owned vehicle fleets to all electric or further building a clean energy infrastructure to be the foundation of what the state builds upon.
