Why are you running for this position? What in your background has led you to run? (Not to exceed 150 words)
. I have been a member of the United Steel Workers union for over 35 years, and I am still employed at Kaiser Aluminum where I began my union membership. I have served in various positions in my local union and as an executive board member of the Spokane Regional Labor Council, I remain a sitting regional Vice President on the Washington State Labor council. My experiences during several labor disputes with the Kaiser corporation led me to becoming active in politics. I have seen firsthand the devastating effects of greed, lust for power and economic injustice inflicted on working class Americans and I found it to be unconscionable to remain silent.
Please explain how your campaign will address donations from utilities, fossil fuel companies, and corporate PACs?
I am a mini filer I can not accept more than 7000. dollars total in donations.
What are your most significant accomplishments either as an individual, member of a group, or elected official on environment and climate change?
I support the fight against climate change and have publicly stated so.

Briefly list organizations, events, rallies, canvassing, referendums, petitions, or policies and legislation you have engaged in to advocate for environmental protections.

When asked, I have supported efforts to combat climate change.

If elected or re-elected what specific environment, climate change, biodiversity, transportation, building and land use, growth management, and/or environmental justice legislation will you prioritize and champion?

I will support the transition to a clean green economy.

Washington State law sets a target of 90.5 million metric tons (MMT) carbon pollution by 2020, but greenhouse gas emissions rose last year to 102 MMT (Department of Ecology). The state is not on-track. For state office positions, what action will you take to accelerate efforts towards Washington State's 2030 Climate goals, specifically a 45% reduction of carbon pollution below 1990 levels?

Work collaboratively with other legislators and groups like yours to accelerate progress.
